1 Set Of Leather Pockets
1 Felt Set for rails & slate
1 Set (3 Pieces) Slate

Hardware Provided:

16- 3" Torx Head Screws (T-25)
18 -2" Rail Bolts
18-Large Washers For Rail Bolts
12-Small Bolts For Mounting The Leather Pockets
12-Small Washers For Pocket Bolts
16-3" Screws For Securing Slate
36-Needle Point Screws For Securing Pockets
18-1 5/8" Square Head Screws For Mounting Skirts

Procedures:

1. Place legs under corner supports of pool table cabinet in the location desired for pool table to stay.
2. Level the pool table cabinet using wood shims under the supports of each corner on top of the legs.
3. Once the cabinet is level in both directions, run 3" Torx head screws through the supports under the cabinet into the top of the legs. Please be sure to use 4 screws per leg to ensure legs are secure and won't move as they support a lot of weight.
4. After the legs are securely attached to the cabinet, place slate on top of the pool table cabinet making sure to align the marking on

each piece of slate. Marks should make a half moon or circle if they are in the correct position on the cabinet.

Once these steps have been completed, the pool table is ready to have the slate leveled and felt applied. It is recommended that the procedures for felting and leveling the slate be done by a billiards professional
